Overview: Current country program established in 1986. Focus is on primary services and agricultural producing groups that improve food security. USADF has entered into a strategic partnership with bauxite mining company Global Alumina Corporation to fund community development initiatives in areas affected by mining operations. USADF currently manages **2 projects**. Total portfolio commitment is **\$480,000**.

Grantee	Duration	Value	Summary
Centre d'Appui au Développement (CAD) 2713-GIN	2012-2014	\$240,000	Agro-processing (Palm Oil): USADF funds will improve the standard of living and working conditions of women engaged in palm oil production and marketing activities, a key income generating activity in the area. While there is an increasing demand from local and regional markets for palm oil and its derivatives, the women's revenue-generating potential is limited by a lack of technical knowledge, managerial skills, and working capital to fully meet the market demand. CAD will provide funding, training, and technical assistance to at least ten palm oil producing women's groups in the communities of Sangaredi, Boke and Kamsar. This will result in an estimated 30 percent increase in their palm oil production and revenues.
Centre d'Appui au Développement (CAD) 2790-GIN	2012-2014	\$240,000	Services (Skill Trades): USADF funds will improve the standard of living and working conditions of youth and tradesmen located in vulnerable villages in the Boké region by offering technical and business training assistance in skilled industrial occupations, as well as training in areas offering opportunities for self-employment and income generation. CAD will facilitate the implementation of vocational training and livelihood development programs to over 400 unemployed youth and tradesman in the communities of Sangaredi, Boké, and Kamsar. These programs will match trainees with apprenticeships or post-training employment opportunities to ensure that beneficiaries are being trained for real employment opportunities.
